

Everybody Healthy Body

OUR VISION

Together with community leaders in health and wellness, education, parks and recreation, athletics, and as an Aspen Institute Project Play Champion, EBHB is leading an initiative and vision to develop a multi-use campus providing space and facilities as an integrated destination hub connected to other local venues in Butte County.

Physical activity is a key component to addressing critical health situations plaguing our youth and adults – chronic conditions of diabetes, obesity, depressive disorders, ACE, and substance abuse. The 2018 feasibility study identified the need for more space, facilities, and programming throughout Butte County for free play, organized sports, training, and providing the community the opportunity to host tournaments so parents don't have to leave every weekend.

The November 2018 Camp Fire exacerbated the need in a totally different way. Physical activity is a key component in addressing trauma reduction as well as critical health conditions. Evidence-based research demonstrates active kids gain valuable life skills in self-confidence, collaboration, empathy, and are healthier in adult life.

It is our responsibility to provide the venues today and in the future for our children to experience and learn physical literacy for a healthy life.

EBEH will provide a voucher to purchase outdoor recreational equipment (bikes, fishing gear, trampolines, sports equipment, etc.) or pay fees for recreational activities (CARD or PRPD activities like baseball, soccer, football, etc.) If you are interested, please contact the Fire Recovery Counselor, Karen Frieese, to complete an application. Be sure to include your name, email address, physical address, and phone number and what you would like to purchase.
